PROJECTS

Integrated information platform for information about Indian Universities

- A responsive MERN Stack Web Application for a PAN India Information Bank, Built at a 36-hour Smart India Hackathon conducted by the Ministry of Education and AICTE.
My Contribution :Led the design and deployment of a highly scalable and resilient infrastructure on Amazon Web Services (AWS), incorporating load balancing and DNS management to optimize performance and availability.

Trading Pit (Solving For India Hackathon)

- A responsive React Web Application for Stock simulation, stock prediction using AI, and other financial indexing integrated with Google Cloud services.
My Contribution : Led the integration of this project with Google Cloud Platform (GCP) services and managed its deployment to ensure scalability and reliability.

Dialogflow Chatbot Development

- In this mini project I developed a conversational chatbot using Dialogflow to automate customer support inquiries for a retail client
